## Supertunia® and Superbells® Care

- The more sun the better! Ideally, 4 to 6 hours of sun each day. Otherwise plants will flower less and become "leggy".
- To increase flowers and to prevent yellowing of foliage, apply water with soluble plant food, every third watering.
- No deadheading or removal of flowers necessary.
- Supertunias work in both containers and landscapes, while Superbells prefer containers.
- Supertunia Vistas and Mini Vistas are incredibly vigorous and perfect in the landscape, plant on 12-18" centers, to get the most bang for your buck.
- Superbells, like all *Calibrachoa*, can be sensitive to pH levels in soil, for this reason, we suggest letting Superbells shine in containers and hanging baskets.
